

Sequential Marker

- Each injected part is sequentially marked with its own part number, through the action of the ejector plate movement.
- Material INOX 1.4034 – Hardened 48-54 HRC
- This is a Cumsa patented system.
- It is recommended that a safety stopper be used to limit the ejector plate stroke. See below.

Catalog Number

NS-384616

Safety Stopper

- Magnetic safety stop that can be easily installed and removed.
- Material 1.7242 – 55-60 HRC
- Maximum working temperature 130°C

Catalog Number

A
